

# Techniques of Morphing to Stimulate the Teaching with Technology

## Examples within the TI-Nspire Environment and Cabri 3D

Jean-Jacques Dahan, IREM of Toulouse, France

1. My **powerpoint**: if you want to animate the Cabri 2 Plus or Cabri 3D files included in the slide you must have downloaded the plug-ins of Cabri 2 Plus and Cabri 3D on your PC (for free from [www.cabri.com](http://www.cabri.com)). These animations do not work on a mac (apple does not allow activeX).
2. All the **tns files** which names are quoted in the presentation (extension: .tns)
3. All the **Cabri 2 Plus files** (extension: .fig) and all the **Cabri 3D files** (extension: .cg3)

All these documents are in a zip file called **Dahan**.
